

SC303

ACTIVE DIGITAL SHUNT

- Simarine's high precision **SC303 active digital shunt** measures voltage, current and temperature of a battery or battery bank.
- Additionally, it allows the monitoring of tanks for fuel, fresh and grey water.
- Suitable for monitoring:**
 - Current draw of heavy consumers (inverters, bow and stern thrusters, anchor winches),
 - current generators (shore power chargers and solar panels).
- The SC303 has additional inputs to monitor fuel, fresh, grey and black water tank levels.
